Cisco to step up investments in India; to focus on 5G

PRESS TRUST OF INDIA New Delhi, September 14

US-BASED TECH GIANT Cisco on Friday said it is stepping up investments in the Indian market as part of the second phase of its 'Country Digital Acceleration' (CDA) programme that will focus on accelerating innovation and entrepreneurship, 5G use cases for citizen services as well as transportation modernisation.

Speaking to *PTI*, Cisco CEO Chuck Robbins said India is among its few markets where the company has made a second round of investment as part of its CDA programme.

"India is an important market for us. While we are not disclosing the amount we would be investing, it is clear that we are betting on India as a key market. We are adding four more states to our existing initiatives towards areas like innovation, smart cities. We have also signed agreements with Niti Aayog and Bharat Sanchar Nigam Ltd (BSNL)," he said.

Cisco had committed an investment of \$100 million in the first phase of CDA, where it has completed about 50 projects, including setting up 10 innovation labs, three smart city showcases and a cyberrange. "The current set of investments will focus on fostering innovation and entrepreneurship through the Atal Innovation Mission, in developing use cases to showcase the possibilities of 5G in citizen services as well as application of innovative digital technologies in transportation modernisation (railways, highways,

SREI Infra moots defence offset funds

INDRONIL ROYCHOWDHURY Kolkata, September 14

INFRASTRUCTURE SREI **FINANCE** has mulled floating defence offset funds to provide equity to MSMEs manufacturing defence equipment. Hemant Kanoria, SREI chairman and managing director, said the proposal was under the government's consideration and it intended to tap a part of defence spending for structured promotion of defence MSMEs.

Original Equipment Manufacturers of defence products, both domestic and foreign, could provide capital to float such funds and companies like SREI could be given the responsibility to manage such funds. Such funds could give returns to investors, while providing finance to defence MSMEs, which often fail to supply orders forwant of capital.

Mandatory offset for defence procurement requires 30% of the total equipment needed in making a defence product to be sourced from the domestic market. Ajay Kumar, defence production secretary, said at the Bharat Chamber of Commerce-orgainsed defence manufacturing summit that India is poised to place orders worth ₹80,000 crore this fiscal for procuring defence equipment. Of this, orders worth ₹24,000 crore has to be placed within the country, which Kanoria said, could be tapped to fund MSMEs in a structured manner.

With over 6,000 MSMEs across the country working in the defence sector and manufacturing 10,000 products, the government wants increased participation of MSMEs in defence manufacturing so that considerable benefits of the consolidated defence five-year plan, from 2017-2022, which has pegged at spending ₹26.84 lakh crore, remain within the country. The cumulative value of India's defence market for the next five years would be

₹1,80,000 crore. Licensing has been liberalised for the PPP engagement in defence production and Indian bids, 20% less in prices from that of imported products assuring same quality as that of the imported product, would get preference.The government has also entertained suo-moto proposals from MSMEs and has received 50 such proposals in the last six months of which the defence has accepted one proposal so far, Kumar said.

ports, and airports)," he said. Talking about his meeting with Prime Minister Narendra Modi on Thursday, Robbins

said he apprised the minister of the initiatives being taken by the company. "We also talked about how we could potentially work to unleash the younger generation's passion for technology(through entrepreneurship) and how that can be leveraged towards social progress and other areas," he said.

As part of its engagement with Niti Aayog, Cisco will boost connectivity and collaboration across all 100 Atal Incubation Centres by equipping them

with its conferencing platforms. It will also connect these centres with Cisco's incubation and innovation centres across the world to enable entrepreneurs to innovate and go global with digital solutions.

With BSNL, Ciscowill set up a dedicated location to demonstrate use cases of 5G – which promises faster internet speed and better user experience – to address challenges in areas like education, healthcare and agriculture.
